

SPECIAL EXECUTIVE MEMORANDUM [REDACTED]

FEDERAL BUREAU OF INVESTIGATION

UNUSUAL INCIDENTS UNIT

[REDACTED]/[REDACTED]/19[REDACTED]

---

Our great nation was almost pushed to nuclear annihilation, but we were saved; not by soldiers, not by bombs, and not by tanks. Those damn Russkies almost forced our hand, but we navigated one of the greatest crises of the century thanks to [REDACTED].

In reflection of this fact, I request more funding for my unit. The simple fact of the matter is Castro is the least of our worries. Think of how that paperweight shifted the odds from a 1/3 to a 1/729 chance of destruction. Think of the tactical advantage other such objects and anomalies could have in our hands. And consider what the Commies could have their hands on.

That is the reason our unit exists; to protect the American from threats we do not fully comprehend. I understand your fears considering the effect of the pyramid on [REDACTED] mind, but consider the good that it did, that we can continue to do, for the American people.

Many believe that the invention of the nuclear bomb was the first time humanity became capable of destroying itself. In actuality, [REDACTED] [REDACTED]. We don't know what paranormal weapons the Reds could have in their arsenal. We need intelligence on these weapons, we need to increase our own paranormal capabilities, and we need to be prepared for other worldly threats.

We need the UIU.

Unusual Incidents Unit Director

*J. Edgar Hoover*
